Institute For Continuous Improvement
In The Public Sector

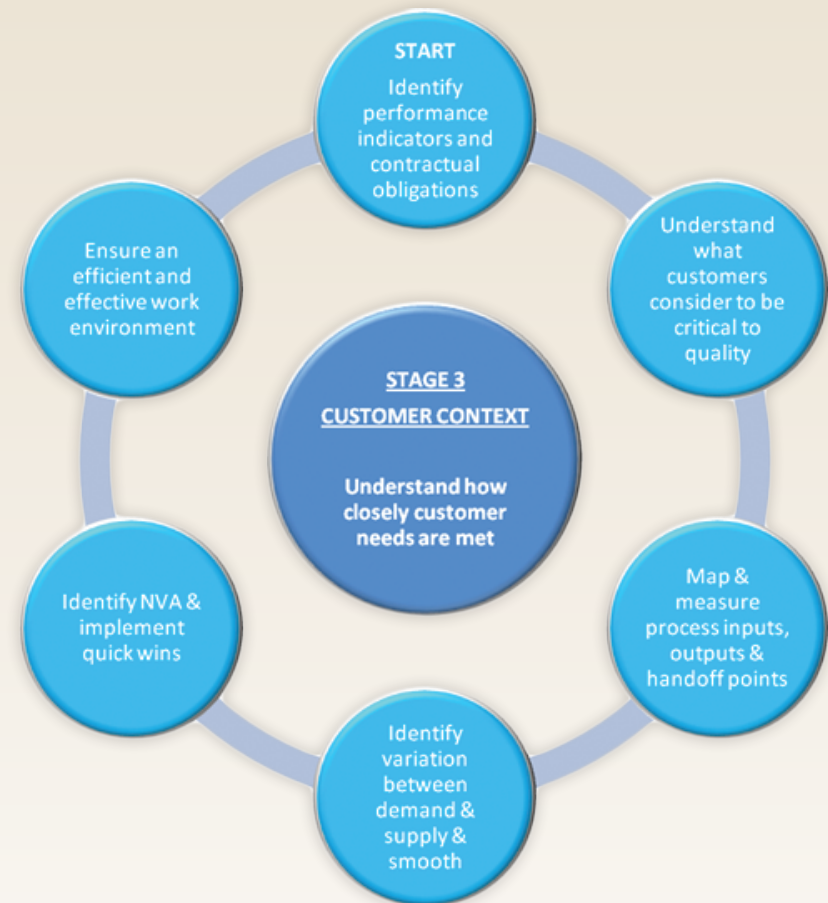

Integr8

Integr8 is a unique 8 stage approach which guides the formulation of improvement strategies and delivery of subsequent improvement initiatives.

It is designed to ensure that the right questions are asked at the right time, encouraging innovation and collaboration.

Follow each stage to ensure improvement initiatives take into account present and emerging requirements across supply chains.

The step by step approach is easy to understand; a set of tools is suggested, with templates provided to help build a picture of the change environment.

The ICiPS maturity and skills frameworks can be used in conjunction with this model.
